

# RELEASE NOTES

## vLMIS VERSION 2.7

---

The release with additional enhancements of web services for DHIS is launched on 13<sup>th</sup> January 2017.

## 1 NEW FEATURES IMPLEMENTED

---

### 1.1 Web Services

The Government of Sindh has requested USAID to enhance the system, the data is extracted through different web services which established a link between LMIS and DHIS through the interface. The required web services are used in the decision-making and increase the control of monitoring and evaluation.

- Percentage of Compliance of vLMIS Consumption Reports
- Percentage of Children Received Measles-I
- Percentage of Compliance of vLMIS Inventory Management

## 2 ARCHITECTURAL CHANGES

---

*This section is meant for Technical Audience*

The architecture review was performed by technical lead and based on his report following actions were taken to resolve all issues identified. To resolve these issues following back-end work was done.

### 1.2 Database Specific Changes

- To maintain the summary data, a new table of consumption summary in the database has been created
- Modification in table: Add status field has been added in the hf\_data\_master table.
