Overview

of Contraceptive Logistics Management Information System

This *User Manual* provides step-by-step instructions which help you get started with Logistics Management Information System (LMIS). It provides guidelines on application features to manage logistics data. This user guide is organized according to the logical flow of LMIS features and describes tasks in the same order you can use while working with the application.

**Before You Begin...**

It is recommended to have a working internet connection for web-access to the application in order to review the application side-by-side when reading this manual.

Background

USAID | DELIVER PROJECT Pakistan has been tasked by the Government of Pakistan with implementing a Logistics Management Information System (LMIS) using a web-based approach. After several months of thorough consultations with all stakeholders from the public and private sectors, the Project adapted and enhanced the web-based application from the Bangladesh model. During the enhancement process, LMIS was contextualized to the local stakeholder structure and devolution.

LMIS was launched by the Prime Minister of Pakistan on July 2011 as the public sector's first Logistics Management Information System.

LMIS has the flexibility to integrate other health commodities in addition to contraceptives. The Project has integrated other health products to meet the provincial integrated commodity management requirements. In addition to the public sector, this application is also able to record contraceptives national sales data of private sector. The system is able to cater to district level reporting by aggregating facility level data through paper-based reports. In Release-2, LMIS has been enhanced for facility level reporting on logistics indicators for each district along-with district store commodities status. To strengthen reporting and visibility of private sector contraceptives, a district level interface has been incorporated in LMIS which will enable provincial and regional health and population departments to see the contribution of the private sector in their respective geographical areas at both the provincial and regional level.

In order to implement the LMIS nationwide, the Project needed to train the expected users of the system. The prescribed training provides knowledge and skills required to enter data into the web-based LMIS. LMIS played a significant role in improving stock monitoring at the district and sub-district level.

The Central Warehouse and Supplies (CW&S) is a national repository for contraceptive commodities. All public sector stakeholders at the district level raise integrated requisition requests to the CW&S for contraceptive supplies. The Project is providing the transportation support from CW&S to the district stores.

Timely and accurate data entry and submission of a monthly report at the district level are critical to the functioning of the LMIS. The data collected from the LMIS can then subsequently be used at each level of the supply chain to enhance informed decision making to meet service delivery demands. Utilization of the LMIS depends on the level of understanding of those trained on its various functionalities.

The Paper-based Logistics Management Structure in Pakistan

There are different vertical programs in public health sector with varying commodity distribution systems for products such as lab equipment, anti-TB drugs and other essential medicines in addition to contraceptives. The verticality of the health system poses a unique challenge in Pakistan. Another complexity includes the fact that some systems are operating under a pull system whereas others are referred to a push system to deliver products.

Some programs distribute directly from the central warehouse to the district stores such as for contraceptive while others flow through different supply chain levels. There are linkages among various stakeholders at national, provincial and district levels for requisitioning, delivery and storage of contraceptives. Any LMIS intended to provide national level stock status and consumption data must accommodate all stakeholders and their linkages.

At the public sector level, there are three main stakeholders; Ministry of National Health Services, Regulations and Coordination (MoNHSR&C), Population Welfare Departments in each province and region and Departments or Directorates of Health in each province and region. Mainly, there are three primary healthcare components of DOH which includes; Static Health Facilities, Lady Health Workers (LHW) program and Mother & Neo-natal Child Healthcare (MNCH) program. Although there are vertical programs in DOH at the provincial levels, these programs are functionally integrated at the district level. However, a reasonably good level of coordination exists between the Health and Population Welfare Departments.

Existing Reporting Structure

Population Welfare Department (PWD)

In the PWD reporting structure, all Service Delivery Points (SDPs) report to their respective district/area/agency and the DPWO compiles as well as sends the CLR-15 report to provincial/regional headquarters. Each Provincial/Regional Headquarter and ICT prepares the CLR-11, which is then sent to the Federal office for preparation of the monthly contraceptive performance report. The CW&S in Karachi sends the CLR-8 monthly for review at the federal level. The CLR-8 provides stock status of commodities lying in CW&S.

Figure-1: A Flowchart showing flow of data from district to federal level in Population Welfare Department.

The following facilities are being managed by district population welfare department which provides contraceptives and supervises activities of following service delivery points:

1. FHC (Family Health Clinic) / RHS-A (Reproductive Health Services – A)
2. FWC (Family Welfare Center)

3. RHS-B (Reproductive Health Services – B)
4. MSU (Mobile Service Unit)
5. Social Mobilizers
6. PLDs (Provincial Line Department Outlets)
7. RMPs (Registered Medical Practitioners)
8. Hakeems (Traditional healers using mostly herbal remedies)
9. Homeopaths
10. DDPs (District Distribution Points)
11. TBA (Traditional Birth Attendants)
12. Counters

About Logistics Management Information System

The draft 2010 population policy clearly emphasizes the importance of an operationally effective logistics management information system (LMIS). A paper-based logistics information system was unable to accurately track the contraceptive stock status at various levels of the supply chain from CW&S to the facility level. Inaccurate reporting of data results in unrealistic forecasting and procurement when trying to work within an entire logistics system. In identifying the need for accurate essential logistics data for decision making, the Ministry of National Health Services, Regulations and Coordination (MoNHSR&C) requested the Project to replace the paper-based system to ensure an effective contraceptive supply chain.

The USAID | DELIVER PROJECT is providing technical assistance to the MoNHSR&C to strengthen the logistics system and improve overall supply chain management. During the years 2008-2009, a series of consultative meetings were held between the Ministry and the Project to access the requirements

of the MoNHSR&C. One of the most important areas which requires immediate attention is enhanced data visibility to ensure improved product availability.

Assumptions

This user manual assumes that you already have Contraceptive Logistics Management Information System accounts as per your geographical level and role. This user manual also assumes that you are familiar with the basic web-application account login procedures.

System Requirements

The Contraceptive Logistics Management Information System is accessible from any Desktop PC, Mac, or Linux computer with Internet access and a supported Web-browser.

Browser Support

The following browsers and later versions fully support cLMIS standard view:

- Mozilla Firefox (Windows, Mac, Linux)
- Google Chrome (Windows, Mac, Linux)
- Netscape (Windows, Mac, Linux)
- Safari (Mac)
- Internet Explorer 9 and above (Windows)

Users and User Roles

2

of Contraceptive Logistics Management Information System

This chapter explains the overview of the user roles of Contraceptive Logistics Management Information System. The web-based application results in the LMIS system contextualized to fit local stakeholder structure and the devolution of health and population programs to provincial governments. The system brings in district-level reporting by aggregating facility-level data through paper-based reports. With a unified system for reporting and requisitioning, the LMIS system is able to integrate information from all levels and sectors. The web-based LMIS can be accessed at <http://lmis.gov.pk>.

In order to log on to the system, the user requires a username and password. Once successfully logged in, the user is directed to the relevant dashboard.

In order to obtain LMIS data and reports, the user must successfully login with his/her username and password. System users are defined by relevant stakeholders and the level in the supply chain they represent. For example, Population Welfare Department users work under Provincial PWD and District Population Welfare Officer.

The following table includes the activities that various users will be able to perform once they login:

Stakeholder and level specific activities users can perform in cLMIS.

Activity	Level		
	Central*	District**	Guest
Data Entry	✓	✓	
Requisitions	✓	✓	
Inventory Management	✓		
Reports	✓	✓	✓
Graphs	✓	✓	✓
Maps	✓	✓	✓

* The Central Warehouse and Supplies will be responsible for entering all central level stock status updates into the LMIS.

Users and User Roles

The Contraceptive Logistics Management Information System Users are basically store operators that manage and record the inventory and stock transactions. Each geographical level entails different user roles associated with their warehouse/store operations.

Guest User

The Guest user can be any web user with the following capabilities:

Feature	Capabilities
Dashboard	View public sector and private sector dashboards.
LMIS Explorer	View monthly store/facility consumption reports using LMIS explorer.
Reports	View logistics analysis in tabular formats.

Maps	View logistics analysis on maps.
Graphs	View logistics analysis as graphs.

Authenticated Users

The Authenticated users can log in to cLMIS and perform assigned functions. Each user is assigned responsibilities based on the role and geographical level.

District Store User

Feature	Capabilities
Dashboard	View public sector and private sector dashboards.
Requisitions (CLR-6)	Add new requisition requests. View requisition requests.
Data Entry (Monthly Consumption Reporting)	Enter new data in stock report. View stock report for previous month.
View Monthly Reports	View monthly reports for the users own district as well as other district stores.
Reports	View logistics analysis in tabular formats.
Maps	View logistics analysis on maps.
Graphs	View logistics analysis as graphs.
Others	Change account password.

3

Step-by-Step

Process to using Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions on getting started with cLMIS. In this section, you will learn about:

1. The Contraceptive Logistics Management Information System Homepage.
2. Logging Into Contraceptive Logistics Management Information System.
3. Changing your account password.
4. What to do if you forget your password.
5. Logging Out of Contraceptive Logistics Management Information System.

LMIS Homepage

The Logistics Management Information System has a single landing page for its three modules for Contraceptives, TB, and Vaccines Management Information System. Enter the URL <http://lmis.gov.pk> to access the application homepage.

Once the user enters the URL <http://lmis.gov.pk>, the homepage will appear. This homepage displays a basic introduction to the 'Pakistan LMIS'.

Before You Begin...

It is recommended to use cLMIS with Google Chrome or Mozilla Firefox. Older generations of browsers are also supported; however, their use can lead to issues with on-screen formatting and display.

Once you click **Contraceptives**, homepage for cLMIS will display.

Logging into Contraceptive Logistics Management Information System

The cLMIS is a web-based reporting and inventory management application that makes it simple for beginners and experienced users to report logistics data, view performance and graphical reports as well as maps.

Users can also access contraceptive LMIS application directly by using <http://c.lmis.gov.pk> URL. Once the user enters the URL <http://c.lmis.gov.pk>, the homepage will appear. The homepage displays a basic introduction to the 'contraceptive LMIS'.

The screenshot shows the homepage of the Contraceptive LMIS. At the top left is the logo of the Pakistan Logistics Management Information System. The main header features three navigation tabs: 'Contraceptive' (orange), 'Contact Us' (blue), and 'FAQ's' (dark grey). Below the header is a large banner with a background image of hands holding a blister pack of pills. The banner contains the text 'MANAGEMENT INFORMATION SYSTEM' in a small orange box, followed by the word 'CONTRACEPTIVE' in large white letters. Below this, it states 'Provides upto date contraceptive logistics data for all public and private sector stakeholders'. At the bottom of the page is a login form with the following elements:

- Contraceptive LMIS USER LOGIN** (text on the left)
- USER NAME *** (label above a yellow input field containing 'dpwo_peshawar')
- PASSWORD *** (label above a grey input field containing '.....')
- Login** (orange button)
- Forget Password** (dark grey button)
- For limited access username: guest and password: guest (small text below the input fields)

cLMIS Homepage Menu

The available menu items can be found on the top of homepage screen. The components are displayed adjacently, as shown in the image below:

Contact Us Tab

The **Contact Us** tab contains addresses, telephone numbers and email addresses (where available) for key personnel as a system communication list. Therefore, the user of LMIS will be able to see contact details of other stakeholders and can contact them as needed.

Frequently Asked Questions Tab

The menu also contains a **FAQ's** tab in order to provide guidance towards the most frequently asked and critical questions.

For logging in to Contraceptive LMIS area:

1. Go to <http://c.lmis.gov.pk>
2. Click the button **Click Here** on the Contraceptives tab.
cLMIS login page will be displayed.

Contraceptive (LMIS)
Pakistan Logistics Management Information System

Contraceptive Contact Us FAQ's

MANAGEMENT INFORMATION SYSTEM

CONTRACEPTIVE

Provides upto date contraceptive logistics data for all public and private sector stakeholders

Contraceptive LMIS
USER LOGIN

USER NAME *
dpwo_peshawar

PASSWORD *

For limited access username: guest and password:
guest

Login Forget Password

3. Specify the Username and Password provided to you by the Administrator.

To login as a guest or anonymous user, you can simply provide the following credentials:

Username: guest
Password: guest

You can change the password provided to you by the administrator. See *“Changing Your Password”* for details.

Never give out your password to anyone for security purposes.

4. Click **Login**. The Contraceptive Logistics Management Information System Dashboard screen displays.

Changing Your Password

To change your cLMIS password:

1. Login to cLMIS application.

The welcome screen displays.

2. On the right-side of the application, the user login name appears.
3. Under the login name, click **Change Password** as shown in the image below:

4. Specify the following:
 - **Old Password:** specify your old password.
 - **New Password:** specify the new password.
 - **Confirm New Password:** retype your password.

Password Requirements

Your password must have a combination of a capital alphabet and one Numeric.

Never give out your password to anyone for security purposes.

5. Click **Change Password**.
Your password will be changed successfully.

Forgot Password

In case you have forgotten your password:

1. Open the cLMIS login page by entering the URL: <http://lmis.gov.pk>.
2. In the Login section, click **Forgot Password** as shown in the image below:

An alert message will be displayed.

Please contact support@lmis.gov.pk

3. The support team will provide you with a new password via email.

Logging Out

When signed in, click **Sign Out** on the right-side of the application, as shown in the image below:

4

Dashboards

for Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions on the dashboard features that can be used by the Contraceptive Logistics Management Information system's users.

Introduction

Dashboard is a visual display of the most important analysis to achieve one or more objectives; consolidated and arranged on a single screen so the information can be viewed at a glance.

User can view following dashboards by default:

- Public Sector Stakeholders
- Private Sector Stakeholders

Public Sector Dashboard

This dashboard allows users to quickly view analysis in a graphical manner for the selected public sector stakeholder.

- **Stock Out vs Over Stock**

This graph shows the stock out and over stock rates in district/sub-district (field) stores for different products. This also mentions the reporting rate on which this analysis is drawn.

- **Stock Issued vs Stock on Hand (SOH) in Central Warehouse**

This graph is showing the comparison between the issued stock and the stock on hand (SOH) for all products in the central warehouse.

- **Consumption vs Average Monthly Consumption (AMC)**

This graph is showing that the comparison between consumption and average monthly consumption of all products for the selected stakeholder and also shows the reporting rate on which this analysis is drawn.

- **Couple Year Protection (CYP)**

This graph is showing the product-wise CYP for the selected month.

- **Couple Year Protection (CYP) Map**

This map is showing the product-wise CYP for the selected month.

Users can apply following filters.

Month	Year	Office Level	Province	Product	
Dec ▼	2014 ▼	Provincial ▼	Sindh ▼	All Without Condom ▼	

- **Month:** select the month from the drop-down list
- **Year:** select the year from the drop-down list.
- **Office Level:** select the Office Level from the drop-down list.
- **Province:** select the Province from the drop-down list.
- **District:** select the district for which you want to view report.

- **Product:** user can either select all products with or without condoms because the logistic analysis of condoms changes the maximum range of graphs to a level where analysis of other products is not shown properly.

Click **Go** to view Public Sector Dashboard.

Stock Out vs Over Stock

Public Sector dashboard shows the stock out and over stock rates in district/sub-district (field) stores for different products. This also mentions the reporting rate on which this analysis is drawn. Users can view the comparison graph for stock out and over stock of products on the horizontal axis and District percentage on the vertical axis.

Users can also export charts in JPEG, PNG, PDF and SVG format.

Stock Issued vs Stock on Hand (SOH) in CW&S

Public Sector dashboard shows the comparison between the issued stock and the stock on hand (SOH) for all products in the central warehouse.

Users can also export charts in JPEG, PNG, PDF and SVG format.

Consumption vs Average Monthly Consumption (AMC)

Public Sector dashboard shows the comparison between consumption and average monthly consumption of all products for the selected stakeholder and also shows the reporting rate on which this analysis is drawn.

Users can also export charts in JPEG, PNG, PDF and SVG format.

Couple Year Protection (CYP)

Public Sector dashboard shows the product-wise CYP for the selected month.

Users can also export charts in JPEG, PNG, PDF and SVG format.

Couple Year Protection (CYP) Map

This map shows the product-wise CYP for the selected month.

Select the stakeholder and the product from the drop-down menu and click **GO**.

Private Sector Dashboard

This dashboard allows users to quickly view analysis in a graphical manner for the selected private sector stakeholder.

- **Stock Out vs Over Stock**

This graph shows the stock out and over stock rates in district/sub-district (field) stores for different products. This also mentions the reporting rate on which this analysis is drawn.

- **Stock Issued vs Stock on Hand (SOH) in Central Warehouse**

This graph is showing the comparison between the issued stock and the stock on hand (SOH) for all products in the central warehouse.

- **Consumption vs Average Monthly Consumption (AMC)**

This graph is showing that the comparison between consumption and average monthly consumption of all products for the selected stakeholder and also shows the reporting rate on which this analysis is drawn.

- **Couple Year Protection (CYP)**

This graph is showing the product-wise CYP for the selected month.

- **Couple Year Protection (CYP) Map**

This map is showing the product-wise CYP for the selected month.

Users can apply following filters.

Month	Year	Office Level	Province	Product	
Dec ▼	2014 ▼	Provincial ▼	Sindh ▼	All Without Condom ▼	

- **Month:** select the month from the drop-down list
- **Year:** select the year from the drop-down list.
- **Office Level:** select the Office Level from the drop-down list.
- **Province:** select the Province from the drop-down list.
- **District:** select the district for which you want to view report.

- Product:** user can either select all products with or without condoms because the logistic analysis of condoms changes the maximum range of graphs to a level where analysis of other products is not shown properly.

Click **Go** to view Private Sector Dashboard.

Stock Out vs Over Stock

Private Sector dashboard shows the stock out and over stock rates in district/sub-district (field) stores for different products. This also mentions the reporting rate on which this analysis is drawn. Users can view the comparison graph for stock out and over stock of products on the horizontal axis and District percentage on the vertical axis.

Users can also export charts in JPEG, PNG, PDF and SVG format.

Stock Issued vs Stock on Hand (SOH) in CW&S

Private Sector dashboard shows the comparison between the issued stock and the stock on hand (SOH) for all products in the central warehouse.

Users can also export charts in JPEG, PNG, PDF and SVG format.

Consumption vs Average Monthly Consumption (AMC)

Private Sector dashboard shows the comparison between consumption and average monthly consumption of all products for the selected stakeholder and also shows the reporting rate on which this analysis is drawn.

Users can also export charts in JPEG, PNG, PDF and SVG format.

Couple Year Protection (CYP)

Private Sector dashboard shows the product-wise CYP for the selected month.

Users can also export charts in JPEG, PNG, PDF and SVG format.

Couple Year Protection (CYP) Map

This map shows the product-wise CYP for the selected month.

Select the stakeholder and the product from the drop-down menu and click **GO**.

Reports

5

for Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions on the report features that can be used by the Contraceptive Logistics Management Information system's users.

When a user clicks the **Reports** tab, the application shows the list of all available reports. These reports include National, Provincial and District level Reports of both public and private sectors. It also includes Stakeholder Reports, Summary Reports, Field Reports and Stock Availability Reports. Quarterly and Provincial Reporting Rate has also been added in the list of available reports.

Click the **Reports** tab from the main menu to show a drop down list which includes a range of reports.

National Summary Report

The National Summary Report provides periodic consumption, average monthly consumption (AMC), stock on hand (SOH), months of stock (MOS) and couple years of protection (CYP) by each commodity for a particular month. The data is summed up for all stakeholders as well as the public and private sector in each commodity to national level.

Reporting and Availability Rates are displayed here

Use Filter options to filter data in the table below

Table displays National Summary of each contraceptive

Product	Consumption	AMC	On Hand	MOS	CYP
Condom	8,821,263	14,112,852.7	250,543,320	17.8	73,511
POP	19,315	21,442.7	625,215	29.2	1,288
COC	677,807	1,010,124.3	20,153,080	20.0	45,187
ECP	1,595	576.7	9,898,956	17,165	80
Copper-T-380A	75,084	85,312.3	3,935,212	46.1	345,386
Multiloop	20,601	8,137.7	955,709	117.4	72,104
2-Month Inj	13,099	8,052.3	181,497	22.5	2,183
3-Month Inj	241,409	404,984.7	9,135,703	22.6	60,352
Implanon	2,428	1,072.3	6,942	6.5	6,070
Jadelle	2,357	877.3	111,197	126.7	11,785

The national summary report not only provides the summary statistics but also opens up various options for users to explore further into the data through various links.

The Header bar displays the Reporting Rate i.e. rate of stores reported on the left side while on the right side, the Availability Rate i.e. rate of stock available is shown. You can click the icon to open the Reporting Rate and Stock Availability rate reports directly.

Click on **Reporting Rate** to view the warehouse stores which have not reported for a particular month.

Click on **Availability Rate** to view the stock availability rate at

Reporting Rate

51.15% Field 57.50% Store/Facility

Availability Rate

50.00% Field 55.19% Store/Facility

selected level i.e. National, Provincial and District level.

MOS legends display the MOS Stock values.

A black box represents an Unknown value.

MOS: Stock Out ■ Under Stock ■ Satisfactory ■ Over Stock ■

Filters

You can use Month and Year filters to filter values based on Month and Year.

Month: Dec ▼ Year: 2014 ▼ Sector: Public ▼ GO

Report Table

- **Product:** It displays the list of products.
- **Consumption:** It displays the consumption data of contraceptives for the last reported month. The data for each product is the sum of all reporting levels.
- **Average Monthly Consumption (AMC):** It is calculated as average of aggregated consumption of the last three non-zero consumption months.
- **Stock on Hand (SOH):** It is the amount of product on hand in order to monitor stock positions and anticipate stock outs in advance.

- **Months of Stock (MOS):** It is the estimate of number of months the stock will last. This calculation is based on average monthly consumption.

- **Couple Years of Protection (CYP):** It is the estimated protection provided by contraceptive methods during a one-year period, based upon the volume of all contraceptives consumed during that period.

National Report - Public Sector Stakeholder(s) = 'PWD' (May 2014)

Show filtered results of Districts.

The report shows the in-country available stock based on filters applied at all levels of supply chain and stocks are also translated in months of stock calculated from Average Monthly Consumption. Separate months of stock for field and store are provided in addition to the aggregate for the two. In this report, only those stores appear which have reported for the period applied to view the report.

Non/Reported Districts

The Non-reported Districts Report provides the reporting rate for provinces as well as districts (by stakeholders) which have not reported for a particular month. If “all” is selected from the option “stakeholder”, all district level stakeholders not reporting for a particular month will appear in the list. For example, a district name will appear twice if both DPIU and DPWO have not reported.

Table displays the quarterly reporting rate for each province

Provincial Reporting Rate

This report shows the provincial reporting rates for particular public sector stakeholders i.e. PWD, LHW and DOH. User can filter report on the basis of month and year.

The filtered results of the stakeholders will be displayed in the form of district reporting rate, field reporting rate and total (overall) reporting rate.

Projected Contraceptive Requirements

This report shows the projected contraceptive requirement for a selected product in each district based on the previous consumption of the product. User can select the ending month, year, demand for number of months, type, stakeholder and province to estimate the contraceptive requirement for each district. The report shows average monthly consumption (AMC), stock available in district store, field and sum of the two for the selected ending month. It also shows desired stock level for 3 months and the requested replenishment stock for the selected store.

Graphs

for Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions on the graph features that can be used by the Contraceptive Logistics Management Information system's users.

The LMIS also has the capability of generating easy to interpret graphs. Simple and comparative graphs can be viewed by selecting the "Graphs" tab. The drop down menu will display:

Once simple or comparison graphs is selected, the user is directed towards a page from where s/he can choose various options to create graphs.

Comparison Graphs

Graph Comparison Report page includes different filters and select option to compare graphs to generate reports. Once the user clicks the 'Indicators', it gives four options to select from:

- CYP (Couple Year Production)
- Dispensed
- MOS(Month Of Stock)
- On Hand

Select Indicators

Indicators:

Products and Year show multiple options to select. The user can choose more than one product and year respectively. By clicking on **Time-Interval** it shows three options:

- Quarter
- Half
- Annual

By clicking on Chart type it shows two options:

- Line Chart
- Bar Chart

The screenshot shows a form with the following sections and callouts:

- Indicators:** A dropdown menu with "Couple Year Protection" selected. Callout: "Select comparison options".
- Compare Options:** A dropdown menu with "Year - National" selected.
- Stakeholder:** A dropdown menu with "All Stakeholders" selected.
- Products:** A list box containing "1-Month Inj", "2-Month Inj", "3-Month Inj", "Implanon", and "Jadelle". Callout: "Select multiple products for comparison".
- Time Interval:** A dropdown menu with "First Quarter" selected. Callout: "Select time Intervals".
- Years:** A list box containing "2015", "2014", "2013", "2012", and "2011".
- Chart Type:** A dropdown menu with "Line" selected. Callout: "Select Line or Bar Chart".
- Generate Report:** A green button at the bottom.

After selecting all values, click here to generate report.

Line Chart

If the user selects line chart, it will generate graph like this:

Click here to view graph in different formats such as PDF, JPG and PNG

Bar Chart

If the user selects bar chart, it will generate graph like this:

Click here to view graph in different formats such as PDF, JPG and PNG

Simple Graphs

User can also choose the same filter options to create a simple graph.

Click here to view graph in different formats such as PDF, JPG and PNG

Show the selected products data.

LMIS Explorer

8

for Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions on the LMIS explorer features that can be used by the Contraceptive Logistics Management Information system's users.

In LMIS explorer, the user can see monthly district warehouse or field store reports and data. If there is no data, a message will be shown.

View Monthly Store/Facility Report

Month: MAY | Year: 2014 | Stakeholder: PWD | Province/Region: Punjab | Store/Facility: Attock | **Go**

Records from 1 to 10 | Page 1 | 10 rows per page

Similarly, the user can view monthly field reports and data. If there is no data for that selected field, it will show zeroes for that specific month.

Guest User

9

for Contraceptive Logistics Management Information System

This chapter explains the step-by-step instructions on the function and features that can be used by the Contraceptive Logistics Management Information system's guest users.

The Contraceptive Logistics Management Information System enables you to login as a guest or anonymous user. Guest users can login into LMIS by entering username and password as 'guest'. When a guest user enters login credentials, they can view analytical reports, maps, graphs and warehouse/district stores data report entered by stakeholder specific users for any period. However, they are not entitled to edit the data.

Logging into Guest user displays the following dashboard screen:

On the left side of the dashboard screen, the guest user will see the following tabs:

Guest: User can sign out of the application by using the following link on the right side of the screen:

- **Dashboard:** User can view dashboards containing graphs, maps and analytical reports by using this tab.
- **Reports:** User can view analytical reports by using this tab.
- **Maps:** User can also view the analytical reports in the form of a map by using this link.
- **Graphs:** User can view simple and comparable graphs by using this link.
- **LMIS Explorer:** This link provide user to view individual warehouse / store data of a selected month.

Authenticated Users - District

10

In Contraceptive Logistics Management Information System

This chapter explains overview of the authenticated users on the district level and describes the tasks they can perform while using Logistics Management Information System for contraceptives.

In order to log on to the system, the user will be allocated a username and password. Once successfully logged in, the user will be directed to a 'user information' page specific to the organization. This page will contain specific information about the user's department or organization.

In order to obtain LMIS data and reports, the user must successfully login with his/her username and password. System users are defined by relevant stakeholders and the level in the supply chain they represent. For example, Population Welfare Department users work under Provincial PWD and District Population Welfare Officer.

After a successful login, the user will be directed to stakeholder specific page. Based on the privileges assigned to the user by the system administrator, various menu items will appear on the interface homepage.

After successful login, district user will see the following menu:

- **DPWO Peshawar:** Name of the User who is currently logged in.
- **Sign Out:** signs out the user to homepage of LMIS.
- **Change Password:** It allows user to change the password.
-  **Home**: By clicking this icon, user will be reached on the dashboard page which appeared just after logging in.
- **Requisitions:** User can add or view requisition requests.
- **Data Entry:** User can enter monthly reports by using this menu item.
- **Monthly Reports:** User can view warehouse / stores reports by using this menu item.
- **Reports:** User can view pre-published analytical reports.
- **PBS Reports:** User can view the PBS reports.
- **Provincial Reports:** User can view the provincial level reports.
- **District Reports:** User can view the district level reports
- **Maps:** User can view analytical reports in the form of maps.
- **Graphs:** User can view pre-published graphs.

Dashboard

Dashboard is a visual display of the most important analysis to achieve one or more objectives; consolidated and arranged on a single screen so the information can be viewed at a glance.

District user can view following dashboards by default:

- Public Sector Stakeholders
- Private Sector Stakeholders

Please refer to the “**Dashboards**” chapter above.

Data Entry (Monthly Stock Consumption)

In order to add monthly stock consumption report, click Data Entry tab from the main menu.

The facility data entry screen will be displayed. To enter consumption data for FWC, click **Add Report** in the FWC name row. (FWC Achar as shown in the screenshot)

Consumption Data Entry		
Store/Facility	Last Update	Reporting Months
FWC, Achar		Add Jan-15 Report
FWC, Achini Payan		Add Jan-15 Report
FWC, Amin Colnoy		Add Jan-15 Report
FWC, Badaber		Add Jan-15 Report
FWC, Badaber Hurizai		Add Jan-15 Report
FWC, Bakhsho Pull		Add Jan-15 Report
FWC, Bana Mari		Add Jan-15 Report
FWC, Bazid Khel		Add Jan-15 Report
FWC, C.D.Dabgari		Add Jan-15 Report
FWC, C.D.Din Bahar		Add Jan-15 Report
FWC, C.M.H		Add Jan-15 Report
FWC, Chagar Matti		Add Jan-15 Report
FWC, Chamkani		Add Jan-15 Report
FWC, Fuji Foundation Hospital		Add Jan-15 Report
FWC, Ghareeb Abad		Add Jan-15 Report
FWC, Gulozai		Add Jan-15 Report

Click the Add Report option under the reporting month column. Once the user selects the Store/Facility and the month in which he/she wants to add data, a data entry screen will appear where the user can fill and save data for the reporting month.

Store/Facility: FWC, Achar; Monthly Report: Dec-2014

Requisitions

Stock Requisition form is being used by EDO (H) for commodities request from CW&S. EDO (H) staff prepares this requisition form on quarterly basis in consultation with storekeeper of DPWO. This form indicates the stock status and consumption during the quarter and indicates the quantity request for each contraceptive being used in respective districts.

The district store users were required to fill out Requisition (CLR-6) based on the previous consumption of that district and submit to the Central Warehouse. However, in Release-2 of cLMIS, Requisition (CLR-6) is auto generated using previous consumption trends for the required quantity of products for the next quarter.

New Requisition

New Requisition (CLR-6) auto-fills the fields by using previous consumption data of a district in a selected quarter. This sheet was previously filled by the requester. District user can create requisition and electronically submit it to the central warehouse. These requisitions will be reviewed by the management of central warehouse and stock will be issued as per stock availability and approval.

Reports

When a user clicks the **Reports** tab, the application shows the list of all available reports. These reports include National, Provincial and District level Reports of both public and private sectors. It also includes Stakeholder Reports, Summary Reports, Field Reports and Stock Availability Reports. Quarterly and Provincial Reporting Rate has also been added in the list of available reports.

Please refer to the “Reports” chapter above.

Maps

The cLMIS also has the capability of generating easy to interpret maps with color codes. These maps can be viewed by selecting the “Maps” tab in the menu. Once the indicator for which the map is to be viewed is selected, the user will be directed towards a page to select from various filters.

Please refer to the “Maps” chapter above.

Graphs

The LMIS also has the capability of generating easy to interpret graphs. Simple and comparative graphs can be viewed by selecting the “Graphs” tab. Once simple or comparison graphs is selected, the user is directed towards a page from where s/he can choose various options to create graphs.

Please refer to the “Graphs” chapter above.
